

SAT practice test error log

One row for every question you missed, guessed on, or flagged. Find each one in Score Details in My Practice, and circle how sure you were and why you missed it. Then re-work the question before you read the explanation, and retest the same topic a week later.

WHY I MISSED IT

C = Content gap. I didn't know the rule, formula or skill.
S = Slip. I knew it, but made a small error: sign, arithmetic, copied a number wrong.
T = Timing. I rushed it or guessed because the clock was running out.
M = Misread. I answered a different question than the one asked.

STILL STUCK? ASK AN AI TUTOR LIKE THIS

1. "I got this SAT question wrong. Don't tell me the answer yet. Ask me how I set it up."
2. "Here's my work. Which step went wrong?"
3. "Give me a similar question with different numbers so I can check that I've got it."
Skip "What's the answer?" You need to be able to do it without help on test day.
